LIST OF CONTENTS

NUMBER 1

	i	Softstrip® data strips containing the tables of contents
D. J. Dawe and **Z. G. Azizian**	1	The performance of Mindlin plate finite strips in geometrically nonlinear analysis
I. D. Desai and **V. S. Chandrasekaran**	15	Semianalytical finite element procedure for nonlinear material behaviour
J. L. Chaboche and **G. Cailletaud**	23	On the calculation of structures in cyclic plasticity or viscoplasticity
W. Kanok-Nukulchai	33	On a microcomputer integrated system for structural engineering practices
A. F. Sayegh and **F. K. Tso**	39	Treatment of frictionless contact boundaries by direct minimization
S. A. Ali	51	Dynamic response of sagged cables
H. S. Mitri, R. M. Korol and **F. A. Mirza**	59	A twin shear beam model for double chord RHS joints
S. Kitipornchai and **C. M. Wang**	69	Lateral buckling of tee beams under moment gradient
F. S. Wong	77	Finite element/difference methods in random vibration
N. Ganesan and **S. Nagaraja Rao**	87	Vibration of annular plates partially treated with unconstrained damping layer
K. W. Shushkewich	95	Time-dependent analysis of segmental bridges
		Technical Note
T. Sakiyama	119	A method of analyzing the elastic buckling of tapered columns
	I	Software survey section GRAFMATIC, OMNIPLOT [S] and [P], PLOTMATIC, FRACDYN, FRACDYN2, BCLFEM (Battelle Columbus Laboratories' Finite Element Methodology)

NUMBER 2

	i	Announcement
S.-C. Chang	121	Lanczos algorithm with selective reorthogonalization for eigenvalue extraction in structural dynamic and stability analysis
D. Briassoulis	129	Equivalent orthotropic properties of corrugated sheets
R. A. Chaudhuri	139	An equilibrium method for prediction of transverse shear stresses in a thick laminated plate
R. Szilard	147	An energy balancing strategy for solution of combined geometrical and material nonlinearity problems
T. Belytschko, Z. P. Bažant, Y.-W. Hyun and T.-P. Chang	163	Strain-softening materials and finite-element solutions
J. Padovan and R. Moscarello	181	Locally bound constrained Newton–Raphson solution algorithms
P. E. O'Donoghue and S. N. Atluri	199	Control of dynamic response of a continuum model of a large space structure
H. V. S. Ganga Rao and C. C. Spyrakos	211	Closed form series solutions of boundary value problems with variable properties
M. M. Attard	217	Lateral buckling analysis of beams by the FEM
H. Adeli and H.-H. Chyou	233	Plastic analysis of irregular frames on microcomputers
J. J. Engblom and O. O. Ochoa	241	Finite element formulation including interlaminar stress calculations
J. Padovan and J. Lackney	251	Constrained hierarchical least square nonlinear equation solvers
T. T. Baber	265	Nonzero mean random vibration of hysteretic frames
K. S. Surana and P. Kalim	279	Isoparametric axisymmetric shell elements with temperature gradients for heat conduction
	I	Software survey section

NUMBER 3

	i	Announcement
W. Altman and **E. Lucena Neto**	291	Vibration of thin shells of revolution based on a mixed finite element formulation
P. B. Thanedar, J. S. Arora and **C. H. Tseng**	305	A hybrid optimization method and its role in computer-aided design
F. Cesari and **L. Meneghini**	315	Transient convective–conductive heat transfer problems in the PEC fast breeder reactor test loop with thermal shocks on the structures
W. E. Bachrach and **T. Belytschko**	323	Axisymmetric elements with high coarse-mesh accuracy
H. H. Abdel Rahman and **E. Hinton**	333	Nonlinear finite element analysis of reinforced concrete stiffened and cellular slabs
D. Z. Yankelevsky and **M. Eisenberger**	351	Analysis of a beam column on elastic foundation
N. Miyazaki	357	On the finite element formulation of bifurcation mode of creep buckling of axisymmetric shells
B. J. D. Esping	365	The OASIS structural optimization system
V. Thevendran	379	A numerical approach to the analysis of circular cylindrical water tanks
C. J. Brown and **A. L. Yettram**	385	The elastic stability of stiffened plates using the conjugate load/displacement method
H. Adeli and **Y. J. Paek**	393	Computer-aided analysis of structures in INTERLISP environment
E. Hinton and **H. C. Huang**	409	A family of quadrilateral Mindlin plate elements with substitute shear strain fields
G. Parthasarthy, N. Ganesan and **C. V. R. Reddy**	433	Study of unconstrained layer damping treatments applied to rectangular plates having central cutouts
H. I. Epstein and **T. J. Strnad**	445	Liquid-filled, liquid-supported, circular structural membranes: partial and overfull conditions
		Technical Notes
V. K. Thompson	451	Elastic buckling of double walled cylindrical storage tanks—numerical and analytical estimates

K. Kanaka Raju and G. Venkateswara Rao — 457 — Post-buckling behaviour of moderately thick circular plates with edges elastically restrained against bending rotation

Letter to the Editor

G. Beer — 459 — Comment on "A comparison of the boundary element and superposition methods"

I Software survey section

NUMBER 4

i Announcement

E. S. B. Machaly — 461 — Optimum weight analysis of steel frames with semi-rigid connections

S. Ginsburg — 475 — Self-adapting menus for CAD software

S. F. Jóźwiak — 481 — Minimum weight design of structures with random parameters

Md. W. Uddin — 487 — Large deformation analysis of ellipsoidal head pressure vessels

P. G. Papadopoulos — 497 — A triaxial network constitutive model

K. K. Raju, G. V. Rao and R. Neetha — 503 — Post-buckling behaviour of cylindrically orthotropic annular plates

H. Adeli and K. Phan — 509 — Interactive computer-aided load and resistance factor design of plate girders

A. Podhorecki — 535 — The viscoelastic space-time element

A. S. Kumar and T. S. Sankar — 545 — A new transfer matrix method for response analysis of large dynamic systems

T. Y. Kam and F. S. Lee — 553 — Nonlinear analysis of steel plane frames with initial imperfections

A. Kaveh — 559 — Graph theoretical methods for efficient flexibility analysis of planar trusses

I Software survey section

NUMBER 5

	i	Announcement
E. S. B. Machaly	565	Optimum weight analysis of steel grids with semirigid connections
E. S. B. Machaly	575	Optimum weight analysis of steel grid bridges
C. Jeyachandrabose and J. Kirkhope	587	Construction of new efficient three-node triangular thin plate bending elements
C. Soize, P. M. Hutin, A. Desanti, J. M. David and F. Chabas	605	Linear dynamic analysis of mechanical systems in the medium frequency range
C. H. Yu and N. E. Shanmugam	639	Stability of frames with semirigid joints
I. E. Harik and R. Ekambaram	649	Seminumerical solution for buckling of rectangular plates
S. Utku, S. K. Ray and B. K. Wada	657	On control of stresses in silicon web growth
A. Zochowski	665	A variational interpretation of homogenization and its extensions
W. K. Liu and H. Chang	671	On a numerical method for liquid filled systems
W. K. Tso and V. W.-T. Cheung	679	Decoupling of equations of equilibrium in lateral load analysis of multistory buildings
H. Achyutha, R. Jagadish, P. S. Rao and S. S. Rahman	685	Finite element simulation of the elastic behaviour of infilled frames with openings
	697	Announcements
	I	Software survey section FINESTRA, CORE3D, MATHPAK 87, VISPLAS, GIFTS, MAKEBASE, MSC/mate, GEOSOFT CONTOURING, FE2000, PVCHEK

NUMBER 6

	i	Announcement
S. Al-Noury	699	Time-dependent nonlinear fatigue analyses of the TLP in the Arabian sea environment

J. P. Clech, J. L. Lewis and L. M. Keer	715	A finite element technique for determining mode I stress intensity factors: application to no-slip bi-material crack problems
E. A. Sadek	725	Direct versus indirect methods in structural optimization
E. M. Bakr and A. A. Shabana	739	Geometrically nonlinear analysis of multibody systems
E. N. Mastrojannis	753	Bending of an axisymmetrically loaded thin circular plate on a layered elastic half-space
G. J. Turvey and N. G. V. Der Avanessian	763	Elastic large deflection of circular plates using graded finite-differences
A. Raman and M. Annamalai	775	Structural scale modelling by finite element method approach
Y. Yaniv and I. Levit	779	The sequence of mini-max subproblems procedures for the solution of symmetric eigenvalue problems
M. J. Abdul-Mihsein, A. A. Bakr and A. P. Parker	787	A boundary integral equation method for axisymmetric elastic contact problems
A. F. Blom and R. Glemberg	795	Dynamic stress intensity factors for ultrasonic fatigue test specimens
A. Mukherjee and M. Mukhopadhyay	807	Finite element free flexural vibration analysis of plates having various shapes and varying rigidities
C. W. S. To	813	The stochastic central difference method in structural dynamics
E. R. Christensen and S. W. Lee	819	Nonlinear finite element modeling of the dynamics of unrestrained flexible structures
M. E. Gadala, M. M. ElMadany and M. S. Gadala	831	Finite element and analytical modelling of a tractor–semitrailer vehicle
H. Adeli and K. V. Balasubramanyam	837	Interactive microcomputer-aided design of circular suspension cable roofs
K. H. Law	845	A parallel finite element solution method

W. Ostachowicz and D. Szwedowicz 859 Vibrations of beams with constructional friction

Technical Note

R. Neetha, K. Kanaka Raju and G. Venkateswara Rao 869 Post-buckling analysis of moderately thick elastic annular plates

Announcements

871 Fourth Rilem International Symposium on Creep and Shrinkage of Concrete
Symposium on Sensitivity Analysis in Engineering

872 NUMETA 87
